

INVITATION

TRENDS & NAVIGATING DISRUPTION: THE FUTURE OF LIFE SCIENCES IN AN AGE OF AI AND UNCERTAINTY

A Swiss-American dialogue on building resilient innovation across the pharmaceutical development lifecycle

Panel Discussion

Join us for an evening discussion on the future of the life sciences industry, hosted by the Swiss-American Chamber of Commerce, New York Chapter, in partnership with RSM US LLP and Swiss Business Hub USA.

The conversation will feature Kimberly Harrelson, Vice President and Head of Ethics & Compliance at Lonza and Christian Thieme, VP of Marketing at groninger USA, moderated by Amanda Laskey, Life Sciences Senior Analyst and Senior Manager at RSM US LLP.

Artificial intelligence is rapidly transforming the life sciences sector—from drug discovery to manufacturing and supply chains. At the same time, companies are navigating increasing geopolitical and regulatory uncertainty. How can organizations accelerate innovation while managing this evolving landscape?

This evening will bring together leaders from biotech, medical devices, manufacturing, and distribution for a candid conversation on how companies are adapting and staying competitive as the industry continues to transform.
